

Graphic Technician

Telford

£competitive + bonus + additional benefits

We are excited to be recruiting for a specialist consultancy who deliver strategic design led solutions across a diverse range of sectors in the UK. Due to expansion they're seeking a talented individual to join their practice who has an ambition and energy to match theirs!

Looking to strengthen their Environmental team, you will be joining a supportive and friendly team of Chartered Landscape Architects, Environmental Designers, Graphic Technicians, Ecologists and Planners.

Working alongside a small team of experienced graphic technicians, the portfolio of projects will be varied from quarries, energy schemes, industrial developments to leisure projects and residential/commercial schemes.

Typical day-to-day roles will include; Photomontages, Annotated Photoviews, Zone of Theoretical Visibility studies, Video-fly throughs, 3D landform design and Plans, cross sections and elevations.

The successful candidate will have experience in several graphic packages, ideally Adobe Photoshop/Indesign, AutoCAD or Micro-station and LSS or 3D Studio Max. Experience of preparing visualisations in accordance with best practice guidance (SNH 2017) would be advantageous, but not essential as full training would be given.

This opportunity is more technically driven than design focused and as such, you could be qualified to degree level in Architecture, Landscape Architecture, Engineering or a related subject, however at a minimum you should be able to demonstrate thinking in 3-dimensions with a good basic mathematical ability.

Candidates with good technical skills who have an interest for graphic design will also be considered. In-house training and/or other relevant external training will be given if required.

The practice is open to interviewing candidates across all levels due to their growth.

If you think you have what it takes, we'd love to hear from you. Apply directly or call Donna Banks on 0121 582 0877 for further information about this opportunity.
