

Architectural Technician
Bristol
£23,000 - £39,000 + Bonus + Benefits

We are currently working with an award-winning Architects practice who provide services across Urban Design, Architecture and Sustainability.

Having built an outstanding name for themselves within the industry, the practice endeavour to employ staff who mirror their values and strong work ethic; always willing to go that 'extra mile' for clients. As a close-knit team, company culture is extremely important and they truly pride themselves on engaging and rewarding staff across the business. Whether you're getting involved with baking for a company fundraiser, taking part in a fun run or attending the many social events in their calendar throughout the year, there's always something going on! Professional benefits come alongside that in terms of excellent training & development and a clear route for progression.

The role will involve producing accurate and detailed planning drawing, construction drawings and detailed works instructions, specifications and schedules of work. The role will involve working for developer client and national house builders, therefore a solid understanding of The Building Regulations is essential. You will be preparing masterplans and producing planning drawings for submission of significant residential and mixed-use schemes. Urban design and masterplanning experience are also desirable.

The successful candidate will have experience working on residential/ mixed use projects, knowledge of Housing Quality Indicators (HQI) and proven experience using AutoCAD. Other desirable skills include the use of Sketch Up, Photoshop and Illustrator.

In return, you will receive an attractive salary and benefits/rewards package. There will be a clear route for progression along with lots of additional support and training you may require. Not only that, but you will have a strong brand name behind you.
