

**Senior/ Principal Landscape Architect
Birmingham**

£30,000 - £45,000 + Car Allowance (up to £5,200) + Bonus + Benefits

We are currently working with a highly established independent consultancy who have a national presence. Working across multiple high-profile UK projects, they offer services across the entire project, from planning and design through to delivery.

Due to continued growth, there is now an exciting opportunity for an experienced Landscape Architect to join the team (at Senior or Principal level). You will be undertaking and preparing planning assessments, providing the best advice to both internal and external clients whilst having responsibility for the management of project(s) as instructed by the project associate or director.

The successful candidate will have the ability to independently evaluate landscape techniques and procedures, have a solid understanding of the UK Planning System and relevant legislation and a proven background in preparing draft information to graphics teams for providing clear briefs. An interest and experience of input into Green Infrastructure Strategies would be an advantage, as would experience undertaking LVIA's and appraisals, but not essential for the post.

In addition, the successful candidate will be a Chartered Landscape Architect (or working towards) and have a degree in Landscape Architecture or another relevant subject.

In return, you will work for a growing organisation with a fantastic reputation, offering excellent training and development and a clear route for upwards progression. The organisation is offering a one of the best salaries and rewards package in the current market which also includes flexibility with hours/ home working.
